Description of fiscal impact

This bill increases the number of years a retiree is eligible to work under §19-20-732, MCA, from 3 years to 5 years during their lifetime with no limitation on the amount the retiree can earn without the loss or interruption of their Teachers' Retirement System (TRS) benefits. Based on past experience under current law, this provision is not expected to have a material impact on the system.

FISCAL ANALYSIS**Assumptions**

1. HB 158 increases the number of years a TRS retiree can work under §19-20-732, MCA, from three years to five years during their lifetime.
2. It is assumed that three retirees each year will work their fourth or fifth year under this provision with an average salary of \$55,000 per year.
3. TRS will continue to collect the employer contributions required under §19-20-732, MCA, (currently 20.11% of the salaries of working retirees under this provision).
4. Retirees working under this provision will not pay any portion of the required contributions and this proposal will not increase their benefits due to service or salary while working under this arrangement.
5. The programming cost to modify the TRS pension administration system would not exceed \$800 (8 hours at \$100 per hour) and the minimal cost to update TRS forms and other documentation would be absorbed in our normal operating budget.
6. The actuarial analysis included in this fiscal note is based on the data, methods, assumptions and plan provisions contained in the actuarial valuation of the system performed as of July 1, 2024. This analysis assumed this is the only statutory amendment being considered. If other provisions are enacted, the actuarial impact associated with this proposal may be different

Effect on County or Other Local Revenues or Expenditures

1. The school district contribution rate for an active member of TRS is 9.47% of earned compensation while the employer contribution rate required under §19-20-732, MCA, is 20.11% of earned compensation. To the extent an employer utilizes this provision to hire working retirees instead of hiring active members of the system, the employer contribution rate is 10.64% higher and therefore costs the employer more.

Significant Long-Term Impacts

1. It is not possible to exactly determine the changes in future member behavior that might occur due to this proposal; therefore, the ultimate cost will be dependent on how the proposal changes active and retired members' utilization.
