Description of fiscal impact

SB 404 requires local governments and the Department of Labor and Industry to send the Department of Revenue copies of building permits in order to identify new construction. This process is done currently. The process is voluntary. This would make the timely transmittal of permits a requirement. There will be no significant fiscal impact to the state. Local governments may see new property in their tax bases sooner.

FISCAL ANALYSIS

Assumptions

Department of Revenue

1. SB 404 requires an electrical or new building permit granted by local governments or the Department of Labor and Industry to be reported to the Department of Revenue within one month of issuance.
2. Many local governments already report these permits to the department however their compliance is voluntary.
3. This mandatory reporting will assist the Department of Revenue in finding new property.
4. There are no anticipated costs associated with SB 404.

Department of Labor and Industry

5. The DLI Building Codes Bureau will establish a memorandum of understanding with the Department of Revenue to notify of new construction building or electrical permits. Current resources within the department will be utilized to set up the transfer of permit information.

6. This legislation does not have a fiscal impact on the DLI Building Codes Bureau.

Effect on County or Other Local Revenues or Expenditures

Department of Revenue

1. Under 15-10-420, MCA, local governments are allowed to grow their revenue base by incremental new property (in addition to the inflation adjustment). To the extent that new construction is picked up more rapidly and accurately, local governments may realize the revenue authority sooner.
